Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS

- "I need a clean overview of patient risk factors in one place."
- "Manual aggregation takes too long and introduces errors."
- "Visual clarity is essential for fast clinical decision-making."

THINKS

- "How can we spot early cardiac trends before symptoms escalate?"
- "Integrated health tracking saves valuable diagnostic time."
- "Standardized metrics will improve patient care accuracy."

PERSONA NAME

(Healthcare Analysts & Clinicians)

DOES

- Analyzes complex health records across age and BMI brackets.
- Presents risk reports to medical committees and directors.
- Cross-references lifestyle habits with disease prevalence data.

FEELS

- Anxious about missing critical clinical indicators.
- Motivated to improve patient outcomes through data insights.
- Frustrated with scattered and non-standardized reports.
