SMARTBRIDGE
Let's Bridge the Gap

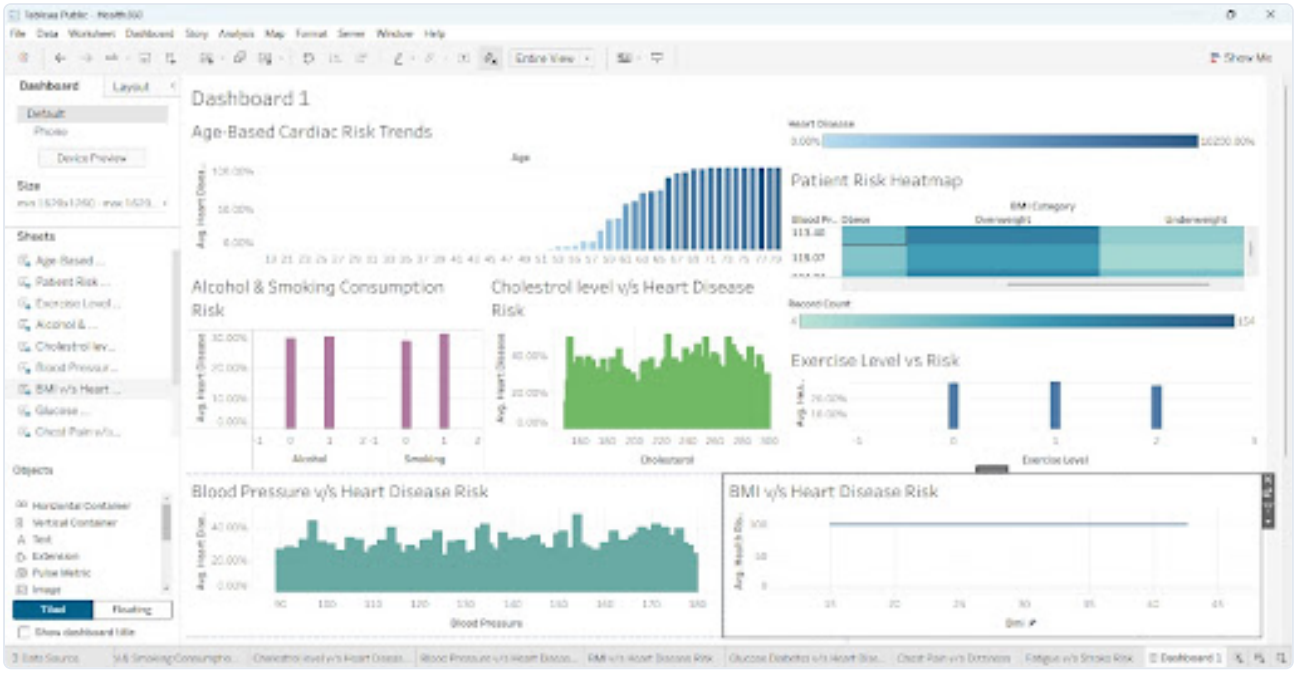

Dashboard Design

Date	28 October 2026	Team ID	EN25CS3011166
Project Name	Smart Healthcare & Cardiac Risk Analytics	Maximum Marks	5 Marks

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience.
Activity 1: Interactive and visually appealing dashboards — Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and interactive features.

- ✓ Clear and Intuitive Layout
- ✓ Colour and Theming
- ✓ Drill-Down Capabilities
- ✓ Use Appropriate Visualizations
- ✓ Interactive Filters and Slicers
- ✓ Responsive Design & Infographics

Executive Dashboard View (Health360 Executive Analytics Dashboard)

Major Outcomes & Strategic Findings

- **Age-Based Cardiac Risk Progression:** The dashboard reveals a noticeable progression in cardiac risk as age increases, peaking sharply among cohorts aged 60 and above.
- **Impact of Lifestyle Risk Factors:** Combined consumption of alcohol and smoking shows a consistently high average heart disease risk, highlighting key lifestyle intervention targets.
- **Biometric Correlations (BP & Cholesterol):** Fluctuations in blood pressure and elevated cholesterol levels strongly align with higher health risk scores across patient groups.
- **Patient Risk Heatmap:** Risk distribution across BMI categories indicates elevated patient counts in the overweight and obese groups, guiding clinical resource allocation.
- **Integrated Multi-Metric Dashboard:** Bringing age trends, risk heatmaps, BP, and BMI into a unified executive view enables rapid clinical assessment and data-driven decisions.

Activity 2: Publish Dashboard on Tableau Public and Paste Link Below
