CUSTOMER JOURNEY MAP

Date	28 October 2026	**Maximum Marks**	2 Marks
Team ID	EN25CS3011166	**Project Name**	Health360: Cardiovascular Risk Analytics

Customer Journey Map: Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Onboarding	Stage 2: Risk Discovery	Stage 3: Consultation
Actions What does the customer do?	Registers via Email / Gmail SSO on mobile app, completes profile setup, and inputs basic vital metrics (Age, Gender, Weight).	Views Health360 dashboard showing personal Cholesterol, BP, BMI, and Fatigue v/s Stroke Risk score.	Schedules a telehealth call with a clinician and reviews personalized cardiac risk heatmap recommendations.
Touchpoint What part of the service do they interact with?	Mobile App Sign-up Page, Email Confirmation link, Profile Information Form.	Interactive Tableau / Streamlit Risk Dashboard, Metric Filters, Risk Indicators.	Customer Care Executive Portal, Telehealth Consultation Module, PDF Summary Export.
Customer Thought What is the customer thinking?	"Is this registration quick and secure? How will my health data be protected?"	"My blood pressure and cholesterol place me in a higher risk bin. What steps should I take next?"	"I hope the medical team gives me clear guidance based on my age-based cardiac risk trends."
Customer Feeling What is the customer feeling?	Curious & Hopeful	Concerned / Anxious	Reassured

CUSTOMER JOURNEY MAP (CONTINUED)

Phase of Journey	Stage 1: Onboarding	Stage 2: Risk Discovery	Stage 3: Consultation
Customer Feeling (Cont.) What is the customer feeling?	Curious & Hopeful	Concerned / Anxious	Empowered
Process Ownership Who is in the lead on this?	**Product & UX Team** Ensures seamless OAuth & quick registration verification.	**BI & Analytics Team** Maintains Snowflake queries & Tableau dashboard visualization.	**Customer Care Executive & Clinical Lead** Manages patient queries and high-risk alerts.
Opportunities How can we improve this stage?	Add one-click social logins (Google/Facebook) and automated OCR scanning for medical test reports.	Introduce AI push notifications when BP or Glucose levels exceed standard safety thresholds.	Integrate direct automated scheduling with cardiologists and 1-click report sharing to WhatsApp/Email.

Summary of Strategic Improvements:

- **Stage 1:** Simplify registration friction using Google/Facebook SSO to increase conversion rates.
- **Stage 2:** Provide real-time threshold warnings on the Patient Risk Heatmap for elevated BMI and Chest Pain indices.
- **Stage 3:** Streamline Customer Care Executive response workflows for high-risk flags identified in Tableau analytics.
