PROJECT DESIGN PHASE-II

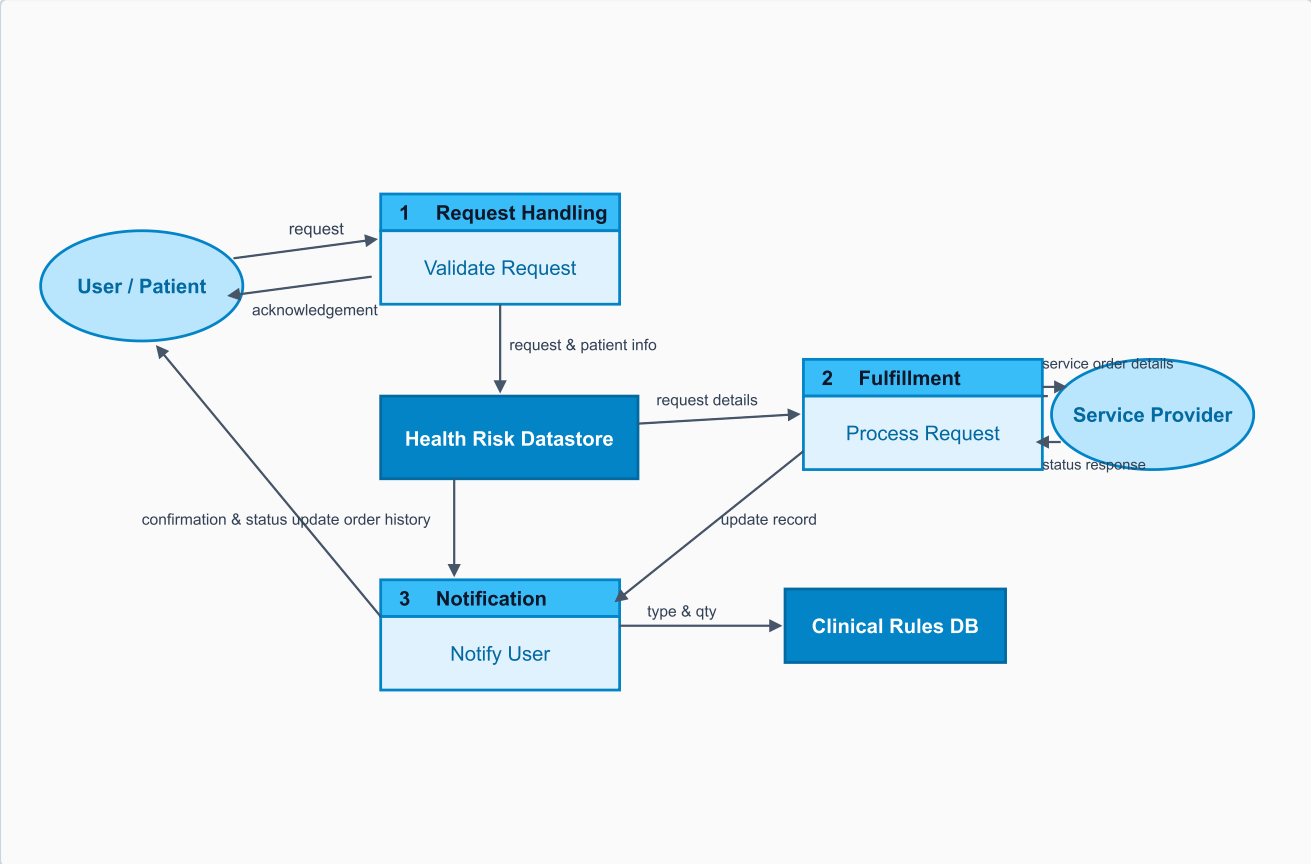

Data Flow Diagram & User Stories

Date	28 October 2026	**Maximum Marks**	4 Marks
Team ID	EN25CS3011166	**Project Name**	Health360: Cardiovascular Risk Analytics

Data Flow Diagrams:

A Data Flow Diagram (DFD) depicts information flows within the Health360 analytical application, showing entities, processes, datastores, and metric flow vectors.

Symbol	Name	Description
Oval / Shape	External Entity	A person or system outside the project that sends/receives data (e.g., User/Patient, Medical Provider).
Header Rect	Process	An activity transforming health metrics into analytical outputs (e.g., Validate Request, Process Request).
Solid Rect	Data Store	A repository where clinical metrics are stored (e.g., Request Datastore, Health Dataset Store).
Labeled Arrow	Data Flow	Movement of clinical records or risk queries between entities and processes.

User Stories:

List of all agile user stories for the Health360 analytics application across User/Patient, Clinician, Customer Care, and Admin.

User Type	Epic	USN	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Mobile User)	Registration & Auth	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	Access account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application.	Receive email & click confirm link	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook.	Register & login with Facebook OAuth	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail.	Register & login via Google SSO	Medium	Sprint-1
Customer (Mobile / Web)	Login	USN-5	As a user, I can log into the application by entering email & password.	Validate credentials & return JWT token	High	Sprint-1
	Dashboard	USN-6	As a user, I want to view my individual Cholesterol, BP, and BMI risk trends in a visual meter.	Display personal health risk summary	High	Sprint-2
Customer Care Executive	Patient Queries	USN-7	As a customer care rep, I can lookup patient risk metrics to answer telehealth support tickets.	Search record by Patient ID	Medium	Sprint-2
	Issue Escalation	USN-8	As a customer care rep, I can flag high-risk patient profiles for immediate clinical intervention.	Trigger urgent alert to medical team	High	Sprint-2
Administrator / Clinical Analyst	Data Ingestion	USN-9	As an admin, I can upload updated CSV datasets containing latest physiological measurements.	Validate schema & auto-refresh dashboard	High	Sprint-1
	Analytics Export	USN-10	As an admin, I can filter Tableau dashboards by Age/Gender and export cohort risk reports to PDF.	Generate filtered summary PDF report	Medium	Sprint-2
